CERTIFICATE OF MAILING OR TRANSMISSION [37 CFR § 1.8(a)]

I hereby certify that this correspondence is being:

☒ transmitted to United States Patent and Trademark Office on the date shown below via the Office electronic filing system.

September 17, 2010 /Tracey L. Riley/
Date Signed by: Tracey L. Riley

Dear Sir:

It is respectfully requested that a Certificate of Correction be issued in connection with the above-identified patent. The required text is submitted on the attached form.

Because the listed errors first occurred in the printed patent, and are not due to Applicant's mistake, no fee is required in connection with this Certificate of Correction.

Fees

- ☒ Any required fee will be made at the time of submission via EFS-Web. In the event fees are not or cannot be paid at the time of EFS-Web submission, please charge any fees under 37 CFR § 1.20(a) which may be required to Deposit Account No. 13-3723.
- ☐ Please charge any fees under 37 CFR §§ 1.20(a), 1.16 and 1.17 which may be required to Deposit Account No. 13-3723.
- ☒ Please charge any additional fees associated with the prosecution of this application to Deposit Account No. 13-3723. This authorization includes the fee for any necessary extension of time under 37 CFR § 1.136(a). To the extent any such extension should become necessary, it is hereby requested.
- ☒ Please credit any overpayment to the same deposit account.

Respectfully submitted,

September 17, 2010

CERTIFICATE OF CORRECTION

Page 1 of 2

PATENT NO.: 7607534
DATED: 27-OCT-2009
FIRST NAMED INVENTOR: Peuker, Marc

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

First Page

Column 1 (Assignee); Line 1-2, Delete “ 3M Innovative Properties Company, St. Paul, MN (US) ” and insert - - 3M ESPE AG, Seefeld, Germany - -, therefor.

Column 2

Line 7; Below “ said container. ” insert - - Preferably, the first end comprises an extension part having a portion with an increased cross-section (compared to the cross-section of the other part of the cannula). A preferred solution is thus to, for example, injection mould a cannula with a tip at one end and an extension part at the opposite end. The extension part is used for attaching the cannula tightly to the container. Preferably, the cannula is inserted into said pocket of said container in order to establish said fluid communication between said pocket and said cannula. - - as a new paragraph.

Line 18-28; Below “ cover member. ” delete “ Preferably, the extension part has a cross-sectional shape comprising sharp edges in the plane between the base member and the cover member, and more preferably comprises a rhombic, triangular or fin-like cross-sectional shape. This cross-sectional shape (in a plane perpendicular to the longitudinal axis of the cannula) of the extension part provides a smooth transition between the extension part and the surrounding base and cover member, and the sharp edges help to avoid hollow spaces between the base member and the cover member, because the sharp edges lay in the plane between the base and the cover member.” .
